Career Objective

Software engineer with experience in C++, ReactJS, Angular, and Spring Boot, contributing across backend, frontend, cloud, security, and production support. Passionate about building reliable software, solving complex problems, and continuously learning new technologies.

Education

Amrita Vishwa Vidyapeetham **Sep. 2021 – June 2025**
B.Tech in Computer Science, CGPA: 8.12 *Coimbatore, Tamilnadu*

Sri Chaitanya Junior College **May 2019 – June 2021**
BIEAP, MPC, Marks: 949/1000 *Vishakapatnam, Andhra Pradesh*

Sri Chaitanya E.M School **May 2018 – April 2019**
SSC, CGPA: 10.0 *Bobbili, Andhra Pradesh*

Experience

SDE 1 at Amadeus Software Labs, Bangalore *JUL 2025 - Present*

- Contributed to MRS and CIT by developing C++ backend and ReactJS frontend features, fixing bugs, and upgrading components to improve maintainability and stability.
- Delivered CIT enhancements including version upgrades, feature improvements, copy customization design, and advertisement slot subscription integration with permission management.
- Supported AppSec work by resolving Audit Trail issues, cleaning up secrets, handling DMARC credential renewal, and investigating PTR items.
- Built translation management capabilities using Angular and Spring Boot, with cloud setup, database integration, real-time AI translations, and multi-phase upload support.
- Assisted with MRS cloud and production tasks including UAT/PRD issue fixes, periodic scans, deployment flow improvements, sync resolution, and CC25 load support.
- Supported IR/PTR backlog triage, transversal activities, and cross-team issue resolution.

SDE intern at Amadeus Software Labs, Bangalore *FEB 2025 - JUN 2025*

- Created and maintained Grafana dashboards to monitor memory usage and Transactions Per Second (TPS) for the SITI project, improving operational visibility.
- Developed a Spring Boot feature to calculate TPS and store results in the database for analysis and reporting.

Skills

Languages: C++, Java, Python, SQL, JavaScript, HTML, CSS

Frontend & Backend: ReactJS, Angular, TypeScript, Node.js, Spring Boot, C++ backend development

Cloud & DevOps: Azure AI Translator, Kubernetes, Docker, Argo CD, Bird, Control Tower, CI/CD, deployment support

Security, Monitoring & Databases: CyberArk, secrets management, Grafana, log monitoring, debugging, MySQL, PostgreSQL, Oracle Database

Tools & Certifications: Git, VS Code, IntelliJ IDEA, Eclipse, PyCharm; Microsoft Azure Cloud Services, Kubernetes and Containers, Linux and Shell Scripting, DevOps

Projects

Phishing Detection Using Evolutionary Algorithm-Based Feature Selection and Model Ensembling | ML, Evolutionary Algorithms| GitHub
Applied genetic algorithms for feature selection and combined machine-learning models to detect phishing websites, with a browser extension concept for real-time detection.

AI-Based IoT for Environmental Control in Oyster Mushroom Production | IoT, AI/ML
Worked on an IoT project focused on environmental monitoring and control for oyster mushroom production in hot climates.

Mentor and Me | HTML, CSS, JavaScript GitHub
Developed an online learning platform concept with course access, enrollment, user authentication, and course-management features.

Water Meter Analyser | Database Systems GitHub
Designed a database-backed system to organize water meter data and support analysis of water usage and related issues.
